**Issue:** Not having sufficient alkaline battery inventory on hand and/ or having a controlled and managed designated storage/dispensing area can result in lost hours, lost employee production time and possible inventory issues both having duplication of inventory throughout your facility or not enough inventory on hand to support business needs.

**Application:** Most organizations need and must have an adequate supply of alkaline batteries to provide portable power to conduct business and/or in preparation of potential emergency situations. Rayovac's new Ultra Pro Alkaline battery management systems deliver a cost effective, efficient inventory management system to keep battery operated devices running.

**Recommendation:** Identify specific areas within a facility for placement of Rayovac's Ultra Pro Alkaline Battery Kits, designed exclusively for Grainger customers, as an alkaline battery inventory management solution system. Facilities can better organize and manage their alkaline battery needs and simplify replenishment with Rayovac's exclusive battery kits and refill trays. All kits and refill trays include Rayovac® Ultra Pro Alkaline batteries in a convenient reclosable and reusable package. These cost effective systems save time, money and reduce down time!

## Product Features & Benefits:

### Rayovac® Alkaline "Ultra Pro" Batteries:

Use to refill existing battery trays

- Easy to open container is reclosable and reusable
- Reclosable packaging protects batteries from damage and short circuiting
- Keeps batteries up right and organized – no loose batteries!
- Batteries have a seven year shelf life
- Designed for professional use
- No Mercury added formula – suitable for land fill disposal
